

EssentialGearGuide

If you enjoy **running the trails**, you probably also enjoy making it home without sore feet, twisted ankles or ripped Achilles tendons. You wouldn't run 10 miles in dress shoes, so why would you **run through the woods** with plain old running sneakers? The **Montrail GTX** lightweight **performance hiker** is designed for the serious user who likes pushing the pace with or without a pack. The ridged yet cushioning sole provides support and comfort. The higher top with extended side shoelace loops provides good ankle stability while the **GORE-TEX material** adds breathability and protection from water.

When you want a waterproof breathable material, it doesn't get better than Gore-Tex. The **Montrail GTX** Gore-Tex running/hiking shoe is ideal for people that will be doing some light hiking or trail running. The **Montrail GTX** gives excellent ankle and side-to-side support while also being suitable for fast paced movement, such as trail running. You will feel equally equipped climbing river boulders or running the dirt path.

Features:

- Midheight uppers feature synthetic leather for support and nylon mesh panels to reduce weight and enhance breathability
- Gore-Tex waterproof booties let feet breathe while protecting them from the elements, keeping feet dry and comfortable
- Nylon linings wick moisture off your feet and dry quickly for comfort
- Removable footbeds add cushioning and support to dual-density EVA midsoles for reliable cushioning underfoot
- Molded midfoot thermoplastic urethane shanks provide support and stability; Trail ShieldT hard EVA plates protect against stone bruising by dispersing point pressure
- Aggressive GryptoniteT GT rubber outsoles ensure reliable traction and durability on rugged trails and paved paths
- Weight 12.6 oz; 0.35 kg
